

**title: Jawan Investments — User Guide author: Jawan Investments
Family Office Platform date: July 2026 version: 2.0**

Jawan Investments — Full User Guide

Family Office Platform · jawan-portal · Version 2.0

This guide covers every function in the Jawan Investments platform: portfolio management, operations, governance, family office workflows, and administration. What you see depends on your **role** and **permissions**.

Feature availability legend

Symbol	Meaning
Available	Full UI — you can use it today
Partial	Basic registration or data stored; dedicated screens still being built
Planned	On the roadmap; not yet in the platform

 24. [Tips & Limitations](#)
-

1. Getting Started

Signing In

1. Open the platform URL in your browser.
2. If you are not signed in, you are redirected to **Sign In**.
3. Sign in with the email your administrator invited you with.
4. After sign-in, you land on the **Dashboard**.

Navigation

- Use the **left sidebar** to move between modules.
- The header shows the current page title and your **user menu** (top right).
- Use the **sidebar toggle** on smaller screens.

Roles & Permissions

Role	Typical Access
Principal	Full access to all modules
Signatory	Read-mostly portfolio; no Expenses or Admin
Finance	Full Loans, Cheques, Expenses; read portfolio; filtered Documents/Reports
Director	Filtered portfolio by assigned entities; full Proposals (submit & approve)
External	Documents only (shared categories — when configured)
Super Admin	Everything, plus Users and Audit Log

Permission levels: Full (read + write) · Read (view only) · Filtered (scoped by entity/category) · None

Entities

Most records belong to an **Entity** (e.g. Jawan Investments). Choose from the dropdown or **Add entity** inline. Filtered users only see assigned entities.

Common Actions

Action	How
Add	Top-right on list pages (write access required)
Edit	Pencil icon or Edit button on detail page
Delete	Trash icon → confirmation (cheques use soft delete)
Upload	File inputs on forms or upload panels on detail pages

File types: PDF, JPG, PNG, WEBP, DOC, DOCX (some modules accept spreadsheets).

2. Dashboard

Path: Sidebar → **Dashboard** · Available

Summary Cards

Card	What it shows
Portfolio Value	Active + monitored assets (ownership-adjusted)
Net Worth	Portfolio minus active liabilities
Active Assets	Count of active holdings
Pending Reminders	Documents, vehicles, expenses, cheques needing attention

Portfolio Overview

Breakdown by asset class: Real Estate, Private Equity, Public Equity, Bonds, Cash, Fixed Assets, Other.

Other Panels

- **Modules** — quick links with record counts
- **Recent Exits** — disposals in the last 12 months
- **Pending Proposal Approvals** — items awaiting your decision
- **Reminders** — expiring documents, vehicle/company renewals, loan maturity, cheques due, overdue expenses

3. Public Markets

Primary path: Sidebar → **Assets** (category: **Public Equity**) · **Partial**

Public markets cover listed equities, ETFs, and broker-held positions. The platform tracks these as **Public Equity** assets in the portfolio registry.

What you can do today

1. Go to **Assets** → **Add Asset**.
2. Set **Category** to **Public Equity**.
3. Enter name (e.g. "US Brokerage Account — Fidelity"), entity, status, currency, acquisition cost, and **Current Value**.
4. Add **Manager Name / Email** for the broker or advisor contact.
5. Save — the holding appears in the Assets list and Dashboard portfolio breakdown.

Data the platform stores (backend)

Each public-markets asset can hold individual positions with:

Field	Purpose
Symbol	Ticker (e.g. AAPL, 2222.SE)
Name	Security name
Quantity	Shares/units held
Cost basis	Original purchase cost
Market price	Latest price per share
Market value	Position value
Unrealised P&L	Gain/loss vs cost basis
Broker	Custodian name
Account number	Brokerage account ref
As-of date	Price date

Import batches (bulk spreadsheet uploads) are also supported in the data model.

Planned screens (not yet available)

- Dedicated **Public Markets** module with holdings table per account
- Bulk **import** from broker CSV/Excel
- Automatic roll-up of position values into asset current value
- Performance and allocation reports

Best practice today

- Register one Public Equity asset per brokerage account or mandate.
- Update **Current Value** manually when you receive statements.
- Store broker statements in **Documents** (category: Banking or Corporate).
- Use **Manager Email** for the relationship manager at the broker.

4. PE / VC Portfolio

Paths: Assets (Private Equity) · Companies · Partial

Private equity and venture capital cover direct company stakes, growth investments, and operating holdings.

Option A — Register a portfolio company (recommended for operating cos.)

1. Go to **Companies** → **Register Company**.
2. Enter registration details, **owners** (name, ownership %, email, phone), CEO, and management contacts.
3. Upload corporate documents (registration, chamber copy, financials).
4. A linked **Private Equity** portfolio asset is created automatically.
5. Manage valuation via the linked asset's **Current Value** in **Assets**.

Option B — Register a direct PE/VC investment

1. Go to **Assets** → **Add Asset**.
2. Set **Category** to **Private Equity**.
3. Enter investment name, entity, dates, acquisition cost, current value, and manager/advisor contact.
4. Use **Description** for round details, fund name, or thesis notes.

PE detail fields (stored; dedicated edit UI planned)

Field	Purpose
Shareholding %	Ownership stake
Valuation method	e.g. Last round, DCF, NAV
Last round valuation	Most recent funding round value
Follow-on rounds	Notes on subsequent rounds
Registered holder	Legal holder of shares
Contact name / email / phone	Founder, GP, or company IR contact

Monitoring & exits

- Set status to **Monitor** for watch-list investments.
- Record an **exit** (sale, transfer, liquidation) from the asset or company detail page.
- Approved investments may originate from **Proposals** (see Section 16).

Planned screens

- PE/VC portfolio dashboard with MOIC, IRR, and round history
- Cap-table style ownership view per company
- Integration with Companies and Proposals on approval

5. Fund & LP Investments

Path: Assets (Private Equity or Other) · Partial

Fund and limited-partner (LP) investments cover commitments to private funds, co-invest vehicles, and fund-of-funds.

Register an LP commitment today

1. Go to **Assets** → **Add Asset**.
2. Choose **Private Equity** (primary fund commitments) or **Other** (alternative structures).
3. Name the record clearly, e.g. "ABC Growth Fund III – LP Commitment".
4. Enter:
 - **Acquisition cost** = total commitment amount
 - **Current Value** = latest NAV or called capital + unrealised value
 - **Acquisition date** = commitment / first close date
 - **Manager name/email** = GP or fund administrator contact
5. In **Description**, record: vintage year, commitment, called capital, distributions, DPI/TVPI notes.

Supporting documents

Upload in **Documents** (category: Legal or Corporate):

- Limited Partnership Agreement (LPA)
- Subscription documents
- Capital call notices
- Quarterly fund reports / K-1s

Planned LP module

Planned feature	Description
Commitment tracking	Committed vs called vs uncalled capital
Capital calls	Schedule and log calls with due dates
Distributions	Record return of capital and profits
NAV updates	Periodic mark-to-market per fund
LP register	All fund interests in one view

Until the dedicated module ships, use **Assets** + **Documents** + **Expenses** (for capital call payments) together.

6. Real Estate

Paths: **Lands** · **Assets** (Real Estate) · **Available** (Lands) · **Partial** (built property assets)

Real estate in Jawan spans **land parcels** (Oman and international) and **built property / development** holdings.

A. Land parcels — Lands module (full detail)

Path: Sidebar → **Lands**

Use for raw land, plots, and titled land with Krooki/Mulkia documentation.

Register land: Name, location (Oman: governorate + wilayat; International: country + city), plot/krooki/mulkia refs, land use, area (m²), entity, registered holders, valuation, documents.

Record a sale: Sold To, Sale Date, Sale Amount, sale documents (SPA, POA, buyer ID) → marks land and linked asset as **Exited**.

See [Section 9 — Lands](#) for full field reference.

B. Built property & developments — Assets (Real Estate)

Path: Assets → Add Asset → Category: **Real Estate**

Use for villas, commercial buildings, rental properties, and developments where you track a single asset value rather than parcel-level detail.

Field	Use
Name	Property name or address label
Current Value	Latest appraisal or market value
Acquisition Cost / Date	Purchase basis
Manager Name / Email	Property manager or agent
Description	Unit count, tenant info, yield notes

Detail fields in data model (edit UI planned): Title deed ref, plot number, BUA (built-up area), location, empty-land flag.

C. Mortgages linked to property

Register property-backed debt in **Loans** → link to the underlying **Asset** as collateral.

How real estate rolls up

- **Lands** creates a linked Real Estate (or land) portfolio asset automatically.
- Dashboard **Portfolio Overview** includes Real Estate in the class breakdown.

- Net worth subtracts active **mortgages** on those properties.

Real estate documents

Document	Where to store
Title deeds, Krooki, Mulkia	Lands module uploads
Valuations, leases	Documents vault (Property / Legal)
Sale agreements	Land sale workflow or asset exit

7. Cash Management

Paths: Bank Details · Assets (Cash) · Cheques · Expenses · Available

Cash management covers liquidity, bank accounts, payments, and cash-position tracking across the family office.

A. Bank account registry

Path: Sidebar → Bank Details

Register every family office bank account:

Field	Required?
Account Name	Yes
Bank Name	Yes
Account Number	Yes
Currency	Yes
IBAN, SWIFT, Sort Code	No
Entity	No
Notes	No

Link **Cheques** to bank accounts when registering outgoing/incoming cheques.

B. Cash positions as assets

Path: Assets → Add Asset → Category: **Cash**

Use for material cash balances held at a bank (separate from the account registry):

- Name = e.g. "HSBC OMR Operating Balance"

- **Current Value** = latest balance
- Description / manager fields for treasury contact

Data model also stores: Bank name, account number, balance on the cash detail record (edit UI planned).

C. Cheque register

Path: Sidebar → **Cheques**

Track all issued and received cheques with status workflow: Pending → Deposited → Cleared (or Bounced / Cancelled / Stopped).

Summary cards show pending outgoing/incoming, due this week, and bounced counts.

D. Expense & payment tracking

Path: Sidebar → **Expenses**

Log invoices, recurring costs, and payment status (Paid / Pending / Overdue). Attach invoices and payment slips.

E. Loan payments

Loan principal and interest payments recorded in **Loans** reduce outstanding balances and affect net worth.

F. Cash flows on assets

When recording an **asset exit**, check **Record proceeds as cash inflow** to log disposal proceeds against the asset.

Planned: Treasury dashboard, multi-currency cash consolidation, FX rate management UI, cash-flow forecasting.

Cash management workflow (recommended)

1. Register all accounts in **Bank Details**.
2. Register major balances as **Cash** assets (update values monthly).
3. Route all cheque activity through **Cheques**.
4. Route operational spend through **Expenses**.
5. Review **Dashboard** net worth (portfolio minus liabilities).

8. Assets (Portfolio Registry)

Path: Sidebar → Assets · Available

The Assets module is the central portfolio registry for all asset classes.

Asset categories

Category	Typical use
Real Estate	Built property, developments
Private Equity	Direct stakes, fund LP commitments
Public Equity	Listed markets, brokerage accounts
Fixed Asset	Vehicles, art, jewelry (also see Cars)
Bonds	Fixed income, sukuk
Cash	Bank balances, liquidity
Other	Alternatives, custom structures

List page

Filters: All · Active · Exited

Columns: Name, Category, Entity, Status, Acquired, Current Value, Updated, Actions

Register / edit an asset

Required: Name, Category, Entity, Status, Currency

Optional: Acquisition Date/Cost, Current Value, Description, Manager Name/Email

Statuses: Active · Monitor · Deferred · Exited (via exit workflow only)

Record an exit

Field	Required?
Exit Type	Yes — Sale, Transfer, Liquidation, Write-off, Other
Exit Date	Yes
Proceeds	Yes for Sale/Liquidation
Buyer / Transferee	For Sale/Transfer
Record proceeds as cash inflow	Optional checkbox
Documents	Sale agreement, transfer deed, closing statement

Note: Land-linked assets must be exited via **Lands** → Record Property Sale.

9. Lands

Path: Sidebar → **Lands** · Available

See [Section 6 — Real Estate](#) for context. Full field reference:

Register land

Oman — required: Land Name, Governorate, Wilayat, Entity

International — required: Land Name, Country, City, Entity

Optional: Village, Krooki/Mulkia/Plot refs, Land Use, Area (m²), GPS, Registered Holders, valuation fields, documents (Krooki, Mulkia, Other).

Property sale

Required: Sold To, Sale Date, Sale Amount. **Optional:** currency, notes, sale documents.

Delete

Permanent — removes parcel, documents, and linked asset.

10. Cars

Path: Sidebar → **Cars** · Available

Oman vehicle registry (Mulkia). Creates a linked Fixed Asset automatically.

Required: Name, Plate Number, Governorate, Wilayat, Entity, Make, Model

Key optional fields: Registration/insurance expiry (Dashboard reminders), Mulkia docs, valuation.

Exit: Record Exit on vehicle detail page.

11. Companies

Path: Sidebar → **Companies** · Available

See [Section 4 — PE/VC Portfolio](#). Creates linked Private Equity asset.

Required: Company Name, Registration Number, Entity

Optional: Owners, CEO, management contacts, registration expiry, corporate documents.

12. Loans

Path: Sidebar → **Loans** · Available

Required: Loan Name, Entity, Principal Amount

Optional: Type, lender, rate, maturity, payment schedule, collateral asset link, **lender contact** (name/email/phone), documents.

Record a payment

Required: Payment Date, Amount, Payment Method

Optional: Principal/interest split, reference, receipt files.

13. Cheques

Path: Sidebar → **Cheques** · Available

Required: Cheque Number, Entity, Amount, Issue Date, Payee (beneficiary for issued cheques)

Statuses: Pending · Deposited · Cleared · Bounced · Cancelled · Stopped

Delete: Soft delete (hidden from lists).

14. Bank Details

Path: Sidebar → Bank Details · Available

Part of cash management — see [Section 7](#). Detail page shows linked cheques.

15. Expenses

Path: Sidebar → Expenses · Available

Access: Principal and Finance only.

Required: Title, Amount, Expense Type

Optional: Status, due date, entity, recurring flag, attachments (invoice, payment slip, cheque copy).

16. Investment Proposals

Path: Sidebar → Proposals · Available

Governance workflow for new investments — from idea through committee approval.

Who can do what

Action	Who
View proposals	All roles with Proposals access
Create / edit / submit	Principal, Director, Super Admin
Approve / reject / return	Assigned approvers
Delete	Submitter only, Draft status only

Proposal lifecycle

Draft → Submit → Pending Approval → Approved
→ Rejected
→ Returned → (edit) → Resubmit → Pending

Create a proposal

Path: Proposals → New Proposal

Field	Required?	Notes
Investment Name	Yes	
Suggested Amount	Yes	
Brief About the Investment	Yes	Summary for reviewers
Recommendation	Yes	Your investment thesis / recommendation
Entity	No	Which entity would invest
Currency	No	Default OMR
Website	No	Company or fund URL
Investment Deck	Yes on submit	PDF or PowerPoint
Approvers	Yes on submit	At least one; cannot select yourself

Buttons:

- **Save Draft** — work in progress; no approvers required
- **Submit for Approval** — requires deck + approvers; notifies workflow

Review a proposal (approvers)

Path: Proposals → **Pending My Approval** → open proposal

The **Approvers** panel shows each reviewer and their decision. When it is your turn:

Decision	Comment
Approve	Optional
Return with Comments	Required — sends back to submitter for revision
Reject	Required

Majority rule: Once more than half of assigned approvers approve → **Approved**. Same for rejections. A single **Return** immediately sets status to **Returned**.

Proposal detail page

- Investment summary (amount, entity, brief, recommendation, website)
- **Approvers** panel with progress (e.g. "2 of 3 approved")
- **Investment Deck** — open/download
- **Comment thread** — full audit of notes, returns, resubmissions

After approval

Log the investment in the appropriate portfolio module (PE asset, Fund LP record, Public Equity account, etc.) and store legal documents in the **Document Vault**.

Filters

All · Mine · Pending My Approval · Approved · Rejected

17. Family, Beneficiaries & Succession

Status: Planned — not yet available as a dedicated module

Jawan is designed to extend into family governance. The following capabilities are on the roadmap:

Planned: Family members

Feature	Description
Member registry	Name, relationship, date of birth, nationality
Roles	Principal, beneficiary, dependent, advisor
Entity linkage	Which entities each member is associated with
Document linkage	IDs, passports, POA stored in vault

Planned: Beneficiaries

Feature	Description
Beneficiary register	Named beneficiaries per entity or asset
Allocation %	Intended share per beneficiary
Asset linkage	Which holdings benefit which family members
Trust / foundation mapping	Beneficial interest in structures

Planned: Succession & estate

Feature	Description
Estate plan documents	Wills, waqf deeds, trust deeds, letters of wishes
Succession timeline	Key dates and trigger events
Ownership transfer workflow	Link exits and transfers to succession events
Reminders	Document review dates, succession planning milestones

What you can do today

Need	Use today
Store wills / estate documents	Documents vault (Legal category)
Track who owns what	Lands holders, Companies owners, asset Ownership %
Transfer assets on death/succession	Record Exit (Transfer type) on assets
Cheque beneficiaries	Payee field on issued cheques
Platform users (staff/advisors)	Admin → Users (not family genealogy)

18. Contacts

Status: **Partial** — contacts are stored per record; central directory **planned**

Where contacts live today

Module	Contact fields
Assets	Manager name, email, phone (notes)
Loans	Lender contact name, email, phone
Companies	CEO, management contact, owner name/email/phone
Lands	Registered holder name, email, phone
PE investments	Contact name/email/phone (data model; UI planned)
Proposals	Submitter and approver users (platform accounts)
Cheques	Payee (beneficiary) or payer name

Planned: Contacts directory

Feature	Description
Central address book	Advisors, lawyers, bankers, GPs, property managers
Categories	Legal, Banking, Broker, GP, Property, Family, Other
Link to records	Attach contacts to assets, loans, companies, funds
Communication log	Notes and meeting history (future)

Best practice today

- Enter relationship manager details in **Manager** fields on assets.
- Store adviser agreements and engagement letters in **Documents**.
- Use consistent naming (e.g. "Ahmed – Bank Muscat RM") in manager/contact fields for searchability.

19. Documents (Document Vault)

Path: Sidebar → Documents · Available

Upload

Field	Required?
File	Yes
Name	Yes
Category	Yes — KYC, Legal, Property, Corporate, Tax, Banking, Other
Expiry Date	No
Entity	No

Status

Valid · Expiring Soon · Expired · Pending · Under Review

Family & estate use

Store wills, LPAs, trust deeds, KYC packs, and adviser contracts here. Set **expiry dates** for documents that need renewal — they appear on the Dashboard reminders.

20. Reports

Path: Sidebar → Reports · Planned

Placeholder only. Planned reports:

- Net worth statement (by entity, currency, asset class)
 - Public markets performance
 - PE/VC portfolio summary (MOIC, IRR)
 - Fund LP capital account
 - Real estate portfolio summary
 - Cash and liquidity report
 - Expense analysis
-

21. Admin: User Management

Path: Sidebar → Users · Available (Super Admin only)

Invite a user

Email, office role, optional super-admin flag, module overrides, entity access, document category scopes.

Manage users

Edit access, deactivate/reactivate, cancel pending invitations.

22. Admin: Audit Log

Path: Sidebar → Audit Log · Planned (UI)

Backend logging is active for create/update/delete across modules. Viewer UI coming soon.

23. Quick Reference by Task

I want to...	Go to...
See portfolio overview	Dashboard
Track listed stocks / ETFs	Assets → Public Equity
Track a VC/PE company stake	Companies or Assets → Private Equity
Track a fund LP commitment	Assets → Private Equity or Other
Register Oman land	Lands → Register Land
Sell property	Lands → Record Property Sale
Track a building / villa	Assets → Real Estate
Manage bank accounts	Bank Details
Track cash balances	Assets → Cash + Bank Details
Issue or track cheques	Cheques
Pay invoices / track costs	Expenses
Submit investment for approval	Proposals → New Proposal
Approve an investment	Proposals → Pending My Approval
Store a will or LPA	Documents → Legal
Find an adviser's contact	Asset/Loan/Company manager fields
Register a vehicle	Cars
Track a loan	Loans
Invite a user	Admin → Users

24. Tips & Limitations

1. **Portfolio classes** — Public Markets, PE/VC, Funds, Real Estate, and Cash all roll up through **Assets** and the **Dashboard** even when dedicated screens are still being built.
2. **Update values** — For Public Equity, PE, and Fund LP records, refresh **Current Value** when you receive statements until automated imports are available.
3. **Linked records** — Lands, Cars, and Companies create portfolio assets; manage exits in the correct module.
4. **Family & contacts** — Use Documents + per-record contact fields until dedicated modules ship.

5. **Proposals** — An approved proposal should be followed by registration in the relevant portfolio module.

6. **Reports & Audit Log** — Coming soon.

7. **Cheque deletes** — Soft delete; most other deletes are permanent.

Appendix — Module implementation status

Area	Status
Dashboard	Available
Public Markets (basic)	Partial
PE/VC (Companies + Assets)	Partial
